6	8-mm Allen wrench

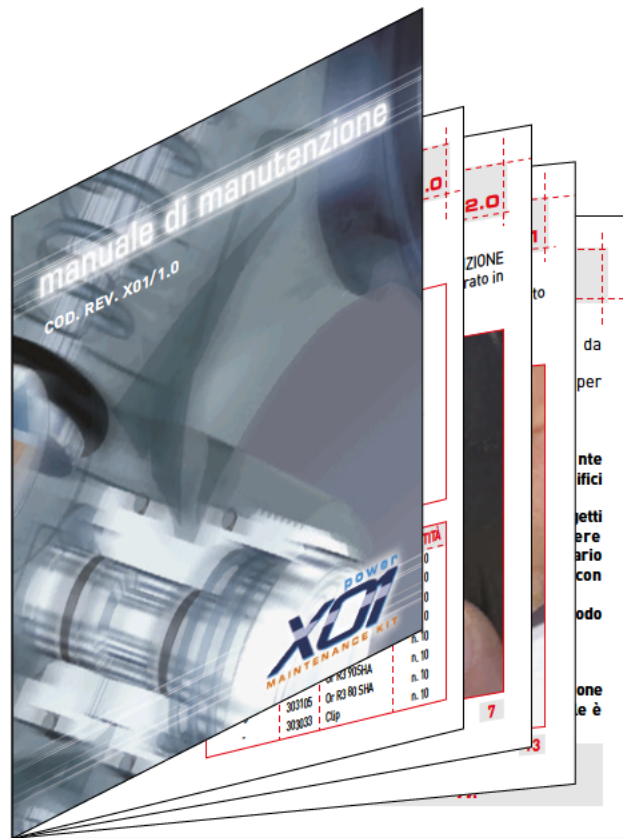

**power**  
**X01**  
MAINTENANCE KIT

This new maintenance kit originates from **Ferplast**'s willingness to concretely meet diving operators' requirements. They show more and more often the need to be able to intervene correctly on maintenance of control unit.

**"Power X01 Maintenance Kit"**, in particular, has been conceived to guarantee a lasting functionality and reliability of piston Power. Actually, **Power X01** is mainly used in the technical sector, where high level performance and safety is required against a high usage frequency.

By means of simple periodic maintenance interventions: cleaning and replacement of parts subject to wear and tear, it will be in fact possible to guarantee **Power X01** highest performance for a long period.

A user friendly  
illustrated  
handbook

The kit is supplied in a comfortable plastic case and it contains all equipment, the specific lubricant and spare parts to carry out maintenance and cleaning interventions of control groups.

**A user friendly illustrated handbook**, included in the kit, shows the intervention necessary to guarantee a perfect efficiency of the groups and allows operators to perform maintenance efficiently and safely. The interventions needed are clearly illustrated by means of colour pictures showing step by step how to disassemble and assemble the Powers.

The kit is already at disposal for commercialization.

## MAINTENANCE KIT POWER X01
